Founded in 1927 in France, Grosfillex built its success with a few consistent goals in mind:

- Meet our customers and consumers expectation in time with high quality products.
- Innovation
- International Presence
- Collaborative work with Passion

Our current product ranges cover multiple markets in residential and non-residential: indoor and outdoor furniture, planters, wall coverings, window, garden sheds and utility storage.

Our relentless search for innovation made us the first company to invent the 100% resin Monobloc chair, a worldwide success. The first company to combine a deco process with resin planters and most recently to introduce the revolutionary 3D digital printing on our wall covering with fantastic renderings!

Over all those years, Grosfillex grew to an internationally renowned company with distribution in more than 100 countries, 3 production sites, France for Europe and Export, Pennsylvania for North America and Brazil for South America.

The North American adventure started in 1969, Grosfillex being the first French company to settle in the Commonwealth of Pennsylvania. Our two business foundations rely on furniture, mainly contract non-residential furniture along with Deco planters where, for both, we are the US leading company, and the sole one to claim a 100% domestic production for planters. We are currently in the process of launching wall coverings and garden sheds in North America.

Nothing would have happened so fast and so consistently over the years without the commitment of all the teams, the collaborative work, team spirit and passion, which remain our core values!
