# SLIM JIM® CONTAINERS

## 80% EASIER TO LIFT LINERS

The Slim Jim® container is designed with four built-in venting channels that create airflow throughout the container. This air circulation reduces the vacuum effect that occurs when lifting out liners in traditional containers. By reducing the pull force required to lift out liners by up to 80%, the Slim Jim® container improves productivity and reduces the risk of injury.

## IMPROVED PRODUCTIVITY

### VENTING CHANNELS

Make removing liners up to 80% easier, improving productivity and reducing the risk of worker injury.

### BAG CINCHES

Secure liners around the rim of the container and allow for quick, knot-free liner changes.

### BASE AND RIM HANDLES

Improve grip and control while lifting and emptying full containers.

### MULTIPLE DOLLY OPTIONS

Allow for efficient collection and transportation of Slim Jim® containers.

## WHY HYGEN™?

### KILLING MICROBES DOESN'T MAKE THEM DISAPPEAR.

OR MORE OF TESTED  
VIRUSES AND BACTERIA,  
WITH WATER ONLY\*  
TO HELP BREAK THE  
CHAIN OF INFECTION.

Microbe removal is a critical step in preventing infection because organic matter and debris interfere with the microbial inactivation of disinfectants.<sup>1</sup>

# WAVEBRAKE®

Rubbermaid Commercial Products introduced the first resin mop bucket in 1974. The BRUTE® mop bucket was introduced in 1995 with new ergonomic features. WaveBrake® was introduced in 2005 with a patented bucket and baffle design that reduced splashing for more efficient, safer mopping.

Rubbermaid Commercial Products continues to innovate, improving the industry-leading splash reduction and adding new features that surpass any other traditional mop bucket. These features help the WaveBrake® clean floors with less effort to get the job done safer.

Proudly made in Winchester, Virginia, WaveBrake® features structural web-molded plastic construction to ensure the highest quality and durability you have come to expect while delivering industry-leading performance.

## DESIGNED FOR PROFESSIONALS

### UP TO 80% LESS SPLASH<sup>1</sup>

Patented WaveBrake® baffles result in less splashing while mopping and maneuvering, helping to create a safer environment for patrons and staff.

### EASY TO EMPTY

A built-in drain eliminates the strain of lifting and bending when emptying mop buckets. Integrated handles help ensure a secure grip to lift and empty the mop bucket.

### 5-YEAR WRINGER GUARANTEE<sup>2</sup>

The side-press and down-press wringers are designed to last 5 years or 200,000 wringing cycles.

<sup>1</sup> Versus competitive 35Qt U.S. single compartment mop bucket and wringer, not including divider bucket and accessories. <sup>2</sup> Based on internal side-press testing.

# COLOR-CODED CLEANING

Cleaning professionals today use a color-coded cleaning system, using color-coded buckets, handles and mops to help reduce cross-contamination. Additionally, they can be organized by function, department or building area, making it easier to track usage.

## RECOMMENDED USAGE:

Color-coding systems can vary by vertical and application; however, Rubbermaid Commercial Products, in alignment with industry experts, recommends the following system:

- **Yellow:** Back-of-House Cleaning
- **Brown:** Back-of-House Cleaning
- **Red:** High-Risk Restroom Areas
- **Blue:** General-Purpose Cleaning
- **Green:** General Food Processing, Serving and Bar Areas
- **Black:** Front-of-House Cleaning

## WaveBreak® Buckets and Wringers

With features that surpass traditional mop buckets, the WaveBreak® helps to clean floors with less effort to get the job done safer, without sacrificing quality and durability.

- **IMPROVE SAFETY AND PRODUCTIVITY:** Patented WaveBreak® baffles result in less splashing while mopping and maneuvering, helping to create a safer environment for patrons and staff. Additionally, water stays in the bucket, eliminating unnecessary trips to the storage closet to fill up the bucket, enhancing productivity
- **80% LESS SPLASHING:** Molded-in WaveBreak® baffles disrupt wave formation, reducing splash up to 80% versus leading competitors\*
- **CONVENIENT TO EMPTY:** The new generation of the WaveBreak® mop bucket is designed to safely empty water with less effort. Integrated handles, sink ledge, and a pour spout provide control while lifting and emptying, for a safe and stable emptying process
- **DESIGNED TO LAST:** The new generation WaveBreak® wringer is designed and built to the highest of quality standards. WaveBreak® wringers have an industry-leading warranty of 5-years
- **INTEGRATED HANDLES AND SINK LEDGE:** Lift and empty the mop bucket easily, with less strain
- **POUR SPOUT:** Helps prevent water from spilling onto floors while emptying dirty water, to help floor remain dry and safe

# MOP CONSTRUCTION DEFINED

## YARN TYPE

Mop yarn type is the most impactful driver of mop launderability, absorbency, durability, and release. Understanding mop yarn type helps drive proper mop selection for varying applications.

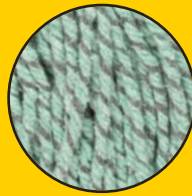

### MICROFIBER TUBE

Most durable, stands up to abrasive cleaning and heavy-duty scrubbing with excellent absorbency.

### FINISH

Designed to provide smooth and even release of chemical and floor finish. Less linting compared to rayon.

### MICROFIBER

Highly durable, non-abrasive general-purpose mop.

### RAYON

General-purpose mopping. Reliable liquid absorption. Highest quality of yarn. Resists mildew growth, extending mop life and white appearance.

### BLEND SHRINKLESS®

General-purpose mopping. Pre-laundered for reduced shrinking. Longer-lasting and less linting compared to cotton. Highly absorbent/no break-in required.

### SYNTHETIC BLEND

All-synthetic mop yarns resist abrasive floor surfaces.

### BLEND

General-purpose mopping. Longer-lasting and less linting compared to cotton. Highly absorbent/no break-in required.

### MAINTENANCE

Made of woven rayon/polyester fabric that will not fray or lint. For use in Class 10,000 and higher industrial applications.

### COTTON

General-purpose mopping. Least expensive yarn option. Reliable liquid absorption. Requires break-in, dries slowly, may lint.

### ROUGH-FLOOR

Knitted fleece cotton/polyester blend yarn for highly abrasive surfaces. High absorbency.

### NON-WOVEN

General-purpose mopping. Least expensive wet mop option. Highly absorbent. Requires no break-in and delivers reduced linting versus cotton. Not launderable.

## HEADBAND TYPE

Headbands drive mop handle selection and can be made of cloth or mesh. Mesh headbands dry faster and can sometimes be used as a scrubbing tool due to the abrasive nature of the material.

### 1" HEADBAND

Most optimal with side-gate Invader® Wet Mop Handle.

### 5" HEADBAND

Most optimal with clamp-style Gripper® Wet Mop Handle.

### UNIVERSAL HEADBAND

Compatible with Gripper® and Invader® Wet Mop Handles.

## TAILBAND TYPE

Tailbands prevent tangling and improve floor coverage for more efficient mopping. Not all mops have tailbands.

### WOVEN TAILBAND

Allows for commercial laundering. Most expensive type of tailband.

### YARN TAILBAND

Requires handwashing or limited residential laundering. Economical tailband choice.

### NO TAILBAND

Requires handwashing only.

## END TYPE

Mop ends can be looped or cut, and ultimately impact mop launderability, fraying, linting, and unraveling.

### LOOPED END

Reduces fraying, linting, and unraveling. Allows for laundering, extending lifetime. Generally more expensive.

### CUT END

Economical and practical general-purpose mop. Ends may fray and unravel. Does not incorporate tailband, covering less area. Disposable or hand wash.

## Dust Mopping

There are several important factors to consider when choosing a dust mop. Use the guidelines on the following pages to choose the best dust mop for your floor care needs.

## General Dust Mopping

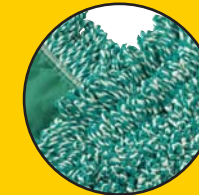

Choose mops with high-dust pickup and durability. If laundering is available, launderable mops will be the most economical choice. Microfiber looped-end and twisted-loop mop heads with reinforced stitching and slip-on/slide-off backing offer the best performance and launderability.

### Mop Construction Features

#### Twisted-Loops

Highly effective at capturing dust and dirt. Premium Twisted-Loops are less prone to snags, frays, and unraveling during cleaning and laundering.

#### Looped Ends

Reduce fraying and depleting for better durability and longer product life. More effective than cut-end mops.

#### Cut Ends

Economical construction for general-purpose dusting.

#### Reinforced Stitching

Reinforced, double-needle stitching at key "wear" points increases product life.

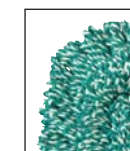

#### Backing Design

Slip-on/slide-off backing allows quick, easy setup or breakdown for standard mop frames.

### Launderability

The launderability of a mop is based on the number of commercial washing and drying cycles it can withstand before the construction of the mop is degraded or the performance declines. Microfiber, synthetic, and blended fiber mops have the highest levels of launderability.

SYNTHETIC

### Durability

The durability of a mop is a measure of how long it will perform before needing to be replaced. Microfiber, synthetic, and blended fiber mops are the most durable.

### Dust Pickup

Dust pickup is the ability of a mop to remove dust and dirt from the floor surface. Microfiber, blended fiber, and synthetic mops have the highest degree of dust pickup.

# MOTORIZED HOUSEKEEPING CART

2173556 / FG618900BLA / 1966889

## MOVE HEAVY LOADS WITH LESS EFFORT

Workers' compensation data from California shows that hotel housekeepers are ~2x as likely to experience an injury from pushing & pulling tasks relative to all other occupations.\*

### REDUCE STRAIN

The battery-powered cart virtually eliminates the need for manual force when transporting heavy loads in both forward and reverse.

### REDUCE DOWNTIME

Facility custodians and housekeepers can complete an average shift using one fully-charged battery.\*\*

Dual onboard battery compartments provide back-up power without having to plug in the entire cart and truck, minimizing costly workflow disruptions due to battery switch outs.

### MAXIMIZE VERSATILITY

The retrofit motorized kits are compatible with new and existing RCP housekeeping carts\*\*\*, providing a range of options to meet facility needs.

\*"Workplace Injuries in Hotel Housekeeping in California" – Department of Industrial Relations (2016)

\*\*Based on an average shift of 8 hours; assumes cart is not continuously running. Continuous runtime is approximately 2 hours.

\*\*\*Compatible carts include FG6189/90/91/92, FG9T1900, 1969596

Spills happen unexpectedly, creating hazards for patrons and staff which need to be cleaned up as quickly as possible to avoid injuries. Using a string mop and bucket can be time-consuming and leaves the floor wet. Over-the-Spill Pads make it easier to cover and absorb spills while simultaneously alerting pedestrians to potential slip-and-fall hazards.

## MOTORIZED TILT TRUCKS

# MOVE HEAVY LOADS

# WITH LESS EFFORT

### REDUCE STRAIN

The battery-powered kit virtually eliminates the need for manual force, reducing strain experienced by users when pushing heavy loads up to 1,000 lbs.

### SAVE TIME

Substituting manual power for battery power helps regain time lost over the course of a shift due to cumulative fatigue.

### DECREASE DOWNTIME

Dual onboard battery compartments provide back-up power without having to plug in the entire truck, minimizing costly workflow disruptions due to battery switch outs.

**Structural Foam Tilt Trucks****Durable one-piece body for decreased maintenance.**

- Ergonomic handles for better handling and steering
- Easy to clean inside and out
- Unibody design promotes a more discreet appearance in public areas

**Motorized Tilt Trucks**

Move heavy loads with less effort.

- Battery powered kit virtually eliminates the need for manual force, reducing strain experienced by users when pushing heavy loads up to 1,000 lbs
- Substituting manual power for battery power helps regain time lost over the course of a shift due to cumulative fatigue
- Dual onboard battery compartments provide back-up power without having to plug in the entire truck, minimizing costly workflow disruptions due to battery switch outs

CASTERS TO MEET YOUR NEEDS

Rubbermaid's best-in-class heavy-duty casters have been specially chosen for each of our products to meet your most demanding environments.

**THERMOPLASTIC RUBBER**

TPR casters absorb shock, provide floor surface protection, and quiet operation. Chemical- and water-resistant.

**POLYOLEFIN**

Hard-tread polyolefin casters roll easier than soft tread casters. Nonmarking, impact- and chemical-resistant casters won't flat-spot under static loads or pick up metal shavings, nails, and other debris.

**PNEUMATIC**

Pneumatic casters provide a cushioned and quiet ride for fragile loads, making them ideal for rough and uneven surfaces, inside and out.

- 1 SURFACTANT:** Cleansing and foaming agent that removes dirt and germs
- 2 FRAGRANCE:** Clean with or without added scents
- 3 DYE:** Clean with or without added color
- 4 MOISTURIZER:** Helps to keep skin hydrated

# AIR CARE

Protect the perception and reputation of your facility with RCP's full line of air care solutions. Our consistent dispensing systems blend into the washroom environment, attack odors at the source, and release fresh-smelling fragrances to create the ultimate sense of cleanliness.

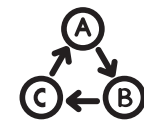

## LEARN THE COMPOSITION

Fragrances are made up of three main "notes" that help to create a blended scent.

- 1 Top Notes:** Also known as "head notes," serve as the first impression you get from the fragrance.
- 2 Middle Notes:** The "heart," or main body of the fragrance, that gives the fragrance its character.
- 3 Bottom Notes:** The base, which tends to be heavier and fuller, giving the fragrance its strength.

## KNOW THE FRAGRANCE FAMILIES

RCP's fragrance options fall within five distinct fragrance families, based upon their scents:

### FLORAL

**Characterized by:** Radiant scents, such as rose, jasmine, and violet; green scents, which are reminiscent of freshly cut grass, leaves, and stems.

### FRUITY

**Characterized by:** Luscious fruity scents, such as apple, pear, plum, mango, peach, and melon.

### CITRUS

**Characterized by:** Invigorating and uplifting scents, such as lemon, mandarin, and other citrus oils.

### HERBAL

**Characterized by:** Powerful, aromatic herbal scents, such as rosemary, mint, coriander, lavender, and sage.

### FOUGÈRE

**Characterized by:** Masculine scents, such as lavender, moss, and woods.

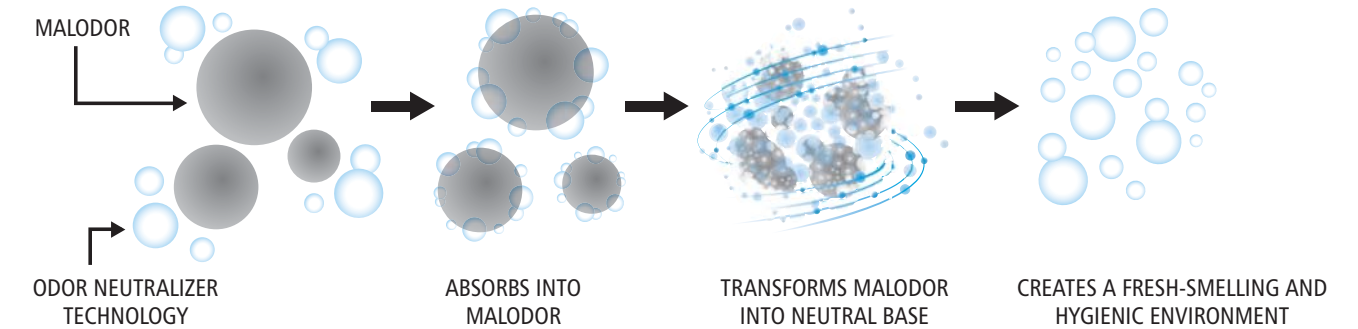

## WHAT SETS RCP FRAGRANCES APART

Traditional air fresheners only camouflage malodors; all of RCP's fragrance options have odor neutralizer, which attacks and effectively eliminates unavoidable odors in the washroom. Thus, completing two jobs in one – removing odors and creating fresh-smelling environments.

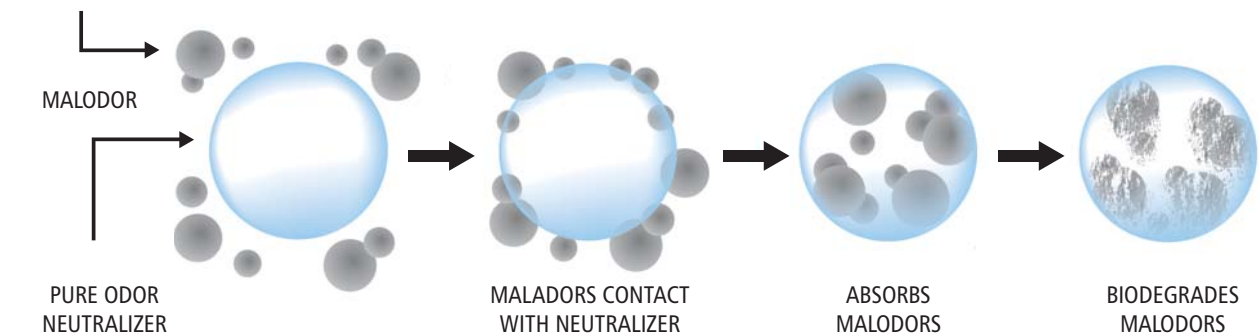

### ODOR NEUTRALIZER

Locks onto malodor molecules to neutralize the odor.

## FRAGRANCE-FREE ODOR NEUTRALIZER

RCP also offers a Pure odor neutralizer for environments, where odor removal is desired, but fragrance is not. This option is a blend of natural extracts and purified water that attracts, captures, and neutralizes malodors.
